	LESSON 24		LESSON 25
	AUTUMN		AUTUMN
GERMAN A way to continue with two languages and be able to take German GCSE. Only eligible to students already studying German in Year 8. A mixture of lessons focused on language and culture including studying a film in German, cooking German food etc.	You will continue with your German learning by starting on the theme of Holidays. You will discuss your holiday habits and learn more about the German speaking world. You will learn how to form the past tense in German, giving you greater control over what you write and say. After Holidays we move on to Media and we will do a film project as part of the unit. After Media you will go on to the topic of Healthy Living and you will learn about German food and will experience cooking lessons in the food tech rooms.	**GERMAN** A way to continue with two languages and be able to take German GCSE. Only eligible to students already studying German in Year 8. A mixture of lessons focused on language and culture including studying a film in German, cooking German food etc.	You will continue with your German learning by starting on the theme of Holidays. You will discuss your holiday habits and learn more about the German speaking world. You will learn how to form the past tense in German, giving you greater control over what you write and say. INTRODUCTION TO KS4 DANCE	Creative Choreography Module 1 This module allows your imagination to take centre stage! You will explore the art of movement using collaboration to tell compelling stories and creative abstract choreography. Get ready to experiment, push your creative boundaries, and bring your unique choreographic vision to life.	**DANCE LEADERSHIP LEVEL 1 QUALIFICATION**	This offers practical and theoretical exploration of leadership skills for dance. You need to take all 4 modules to achieve the qualification.
FOOD SKILLS A further opportunity to develop your practical skills	ITALIAN COOKING - Learn all the techniques you'll need to create classic Italian dishes	**FOOD SKILLS** A further opportunity to develop your practical skills	Mediterrean Cooking - Learn to cook a variety of dishes from the Mediterrean region
FORENSIC SCIENCE* This module offers an insight into the processes and techniques used by Forensic Scientists to solve crimes.	In this module you will follow a nine week course learning Forensic theory and carrying out practical investigations in a range of disciplines. These include Fingerprinting and Blood Spatter Analysis.	**DESIGN AND TECHNOLOGY** Exploring this subject through new and different projects	In the first module, students will use their design and making skills to produce a table tennis racket of their own design, which we will later test and review at the end of the module.
HISTORY & POLITICS This module focuses on momentous events and turning points in world history and politics	Should everyone have to vote? Should there be a change to our electoral system? Should the House of Lords be abolished? In this module, you will learn some of the significant debates in how UK democracy works. From learning the features of a democratic system, to researching the different views of political parties, this will give you a foundation to understanding what is going on in the UK in the news. This nine week module will help you form some of your own political opinions and lead to some exciting discussions!	**GEOGRAPHY** This module will expose and examine some of the important challenges our planet faces both now and in the future, as well as providing you with a chance to investigate some of the most diverse places our planet has to offer	DISASTERS OF HUMANITY AND DISEASE This module will provide students with the opportunity to explore the impacts of some of the most devastating disasters that exist across the world. From apocalyptic floods and destructive tornadoes to crippling diseases and pandemics. You will have the opportunity to explore these frightening phenomena and make decisions on how to protect against them. You will also learn about the chilling effects of global health crises linked to the Ebola Virus and Malaria and see what it takes to help tackle contagions. The safety and health of the global population may be in your hands!
MEDIA STUDIES This module offers insights into key concepts in Media Studies including how to use industry standard software such as Adobe Photoshop and Adobe Premier.	The first Media Studies module is an entry point into the exciting world of advertising and marketing. Advertising is all around us - on billboards, bustops and social media (to name a few). In this module you will be collaborating in groups, after learning the basic concepts of advertising, in making your own ad campaign, including creating print/digital adverts, as well as audiovisual adverts. You will get to plan, create and edit your work as a group.	**FILM STUDIES** This module will give you a chance to watch, discuss and even recreate some of the most influential films that have shaped our culture	The first Film Studies module takes a look at the concept of the Hollywood Blockbuster. Some of the biggest and most influential films in modern media culture would be classed as 'blockbusters', the first often being credited as *'Jaws'* in 1975. In this module, you will learn some basic concepts of film analysis, and then will apply this whilst watching some big blockbuster films. Take this module if you have an interest in action/adventure films!
MUSIC This module offers a range of musical skills, including performance and composition.	BAND SKILLS - This module offers a range of musical skills, including performance and composition. Students considering GCSE Music would benefit from taking one or more of these units.	**MUSIC TECHNOLOGY** This module focuses on how technology is used to create, record and perform music.	REMIX - This module focuses on how technology is used to create, record and perform music. We use a mixture of Garageband, Logic and Sibelius software.
LEARN TO TOUCH TYPE This module is designed to teach students to touch type. By the end of the module, students should be able to type quickly and with both hands - an essential skill for school and work. Very important for students who will use a word processor in exams.	This module is designed to teach students to touch type. Students will engage in typing exercises which teaches them finger placements on a keyboard and how to type efficiently without having to look at the keyboard. This module is designed to support students to type quickly. It is especially helpful for any stuent who may need to use a word processer in their exams in the future. The module is designed only to be taken once. The nature of lessons will be working through typing exercises online in silence with students working at their own pace through the exercises.	**DRAMA** These modules are open to all students and will provide a good grounding for students wishing to pursue Drama at GCSE or those with a passion for performing arts who would like to extend their skills	BACKSTAGE DRAMA: MAKE UP AND SPECIAL EFFECTS This module is designed to teach students the art of creating make up for productions. Each week you will be given a breif and asked to create a final look which you will create on another studen Ranging from theatrical and non naturalistic to modern and beauty inspired. We also cover how to create special effects make up such as cuts, bruises and changing skin texture.
SPORTS LEADERSHIP Leading and officiating in a range of sports	This module will teach th students the skills to be able to plan and lead sports session. Most of the module will be taught practically, but there may be some sessions which are spent working on planning sessions.	**VISUAL ARTS** These modules have been designed with your well-being in mind and aim to provide you with an enjoyable, relaxing time to extend your artistic knowledge and explore new processes and techniques.	FASHION AND TEXTILES DESIGN: This module is designed to introduce students to understanding key fashion designers, the fundamentals of fashion illustration and also fashion design. It will be especially helpful for students who would like to build their knowledge and skills in Textiles prior to completing Textiles at GCSE level.
BUSINESS AND ECONOMICS Exploring Business and Economics through different rotations and projects	PITCH PERFECT - Most businesses require outside investment at some point in their development. BBC's Dragons' Den programme has highlighted the use of venture capitalists as a source of finance for many businesses at different stages. Your challenge will be to develop your own business idea, develop a business plan and pitch it to a group of judges.	**PERSONAL FINANCE*** This module provides an introduction to managing personal finance and understanding their role in the economy	PERSONAL FINANCE - The Personal Finance module will provide you with the skills and knowledge to manage your money well and make sound financial decisions now and in the future. This will include everything from how income and taxes work, savings, buying property and managing investments.
CANTONESE This module is designed to support students taking GCSE Chinese, especially Cantonese speakers	CANTONESE -This module is designed to teach Cantonese speaking students Chinese reading, listening, speaking and writing, in order to get ready to take the GCSE Chinese exam in summer 2027. At the beginning, we will start with some materials equivalent to Primary 4-6 Hong Kong levels. Afterwards, we will practise with the GCSE past papers and do some Chinese dictations. We will try to cover all the vocabulary listed in the GCSE specification. Students are expected to take this module for the whole year so that they can get fully equipped for the exam next summer.	**MANDARIN** This module is designed for non-Chinese learners. It will introduce students to the Mandarin dialect of Chinese, the characters and how Mandarin is written. Students will have opportunities to engage in reading, listening and spoken activities and learn about the history and culture of China.	MANDARIN-This module is designed to teach non-Chinese learners the basics of Chinese writing and speaking. You will learn some useful daily conversations, e.g. How are you? What's your name? What's the weather like? You will also experience some Chinese culture like Lunar New Year and have a taste of Chinese food. By the end of this module, you will know how to introduce yourself including your Chinese name, age, family, favourite food and favourite sports etc.
		PHILOSOPHY OF FILM Exploring philosophical questions through a variety of films	WHAT IS REAL - In this module we will be discussing big questions relating to our understanding of reality, such as how we can trust the world around us, and whether we can know we are living in a simulation? We will do this by watching two films which help explore these ideas and discussing our reflections along the way. The films we are watching will be 'The Truman Show', and 'Bruce Almighty'.
